## 7200NS FLOORCOAT PU

# Single pack anti-slip floor coating

- For foot traffic, interior and exterior
- Anti-slip additive is premixed in the coating
- For use on concrete (>2yrs), metal and wood
- Touch dry after 4 hours
- Apply a 2nd coat to increase the antislip properties

KNOW-HOW TO PROTECT™

WWW.RUST-OLEUM.EU

# 7200NS FLOORCOAT PU

## DESCRIPTION

Anti-slip polyurethane-modified floor coating, abrasion resistant and easy to apply. 1K

## RECOMMENDED USE

Floorcoat PU 7200NS can be applied directly on interior or exterior concrete floors (see surface preparation), wooden floors and masonry which are completely clean and dry. It is not recommended to apply on smooth/dense concrete or concrete containing a damp repellent additive, which will prevent a good adhesion. Floorcoat PU (7200NS) can also be applied on old good adhering coatings and can also be applied onto metal floors which have been correctly prepared and primed with a suitable Rust-Oleum metal primer.

## ТЕХНИЧЕСКИ ДАННИ

density: 0,9-1,2  
solids\_volume: 45%

## DRY TIMES BY 20° C/RH 50%

group\_dry\_10\_touch: 4h  
group\_dry\_20\_handle: 8h  
group\_dry\_30\_recoat: 24h  
group\_dry\_40\_full\_cure: 1 week

## GROUP\_RFT\_10\_WET

110 µm

## GROUP\_RFT\_20\_DRY

50 µm

## GROUP\_COVERAGE\_10\_THEORETICAL

9 m<sup>2</sup>/l

## GROUP\_COVERAGE\_20\_PRACTICAL

Practical coverage depends on many factors such as porosity and roughness of the substrate and material losses during application.

## SURFACE PREPARATION

Remove oil, grease and other contaminations with Rust-Oleum ND14 Cleaner/Degreaser or high pressure (steam) cleaning in combination with appropriate detergents. Sand old intact coatings to roughen the surface in order to establish a good adhesion. Check the compatibility with old intact coatings. During application the surface should be dry and clean. On porous concrete a first coat should be applied with 7200NS diluted with ± 5% Thinner 633. Ensure concrete is at least 28 days old and moisture content lower than 6%. Remove curing compounds by means of dust free blasting or acid etching with Rust-Oleum SE108.

## INSTRUCTIONS FOR USE

To ensure homogeneity, coating materials should be thoroughly stirred prior to use.

## APPLICATION CONDITIONS

Apply in a dry and well-ventilated area. Temperature of air, substrate and coating between 5°C and 30°C and relative humidity lower than 85%. Temperature of substrate must be at least 3°C above dew point.

## GROUP\_APPL\_THINNING\_10\_BRUSH

Dilute sparingly, if required, with 5% volume Thinner 633.

## GROUP\_APPL\_THINNING\_20\_ROLLER

Dilute sparingly, if required, with 5% volume Thinner 633. In case of roller application it can be necessary to apply 2 coats in order to obtain the recommended film thickness.

## CLEANUP\_PAINT

Immediately after application with Thinner 633.

## REMARKS

Do not apply Floorcoat PU (7200NS) on highly alkaline substrates, or in areas which will be constantly under water.

## SHELF LIFE

Minimum of 5 years from date of production in unopened cans, if stored in dry, well ventilated areas, not in direct sunlight at temperatures between 5° and 35°C.
